PROFILE

As a computer engineering graduate, driven by a passion for creating innovative applications, I am highly motivated to pursue a career as a .NET developer, specializing in web development. With a base foundation in hardware from my university studies, I have taken the initiative to expand my programming skills, starting with C and C++. I am now eager to deepen my knowledge and expertise in .NET. I am excited to participate in this software development training to acquire comprehensive and practical .NET development skills. My goal is to build a strong foundation in .NET, enabling me to develop robust and efficient web solutions and become a qualified developer.

PROJECTS

Examify desktop application

Examify is a desktop application that helps teachers manage exams, specifically test exams. It provides a user-friendly interface for teachers to create subjects, add questions, view student results, and more. Students can log in, take exams, and view their scores.

Used technologies:

- Programming language: C#
- Frameworks: Windows Forms, Dapper ORM, Bunifu UI, Guna2 UI
- Database: Microsoft SQL Server
- Version control systems: Git
- Additional tools or libraries: NuGet, Google SMTP Server
